

**SOUTHLAND REGIONAL COUNCIL**  
**(known as Environment Southland)**  
**Invercargill-Rakiura Constituency**  
**Electing 6 Regional Councillors**

---

---

**Nathan SURENDRAN**

My principal place of residence is in the Invercargill-Rakiura Constituency area.

I believe in Southland, we can thrive and prosper through the huge changes we face today. I'm passionate about helping people to understand the options available. I am a UK qualified

professional engineer with a 'systems thinking' perspective. We can't cope with climate change, resource depletion or other fundamental limits without changing our perspective. The economy is only as good as the environment. All economic activity (GDP) needs energy expenditure. Declining energy supply will mean the end of growth.

My bid for Council this year is to see if people are willing to support a clear vision of what we can become, within these limits. I recognise that the solutions must make sense within our specific regional context, and to our people.

If you vote me in, I'll work towards bold, positive steps. To meet the future well, the time for half measures has gone. More info: [snip.ly/kangg](https://snip.ly/kangg)
