

Southland Regional Council
(known as Environment Southland)
Invercargill-Rakiura Constituency
Electing 6 Regional Councillors

Lyndal Ruth LUDLOW

My principal place of residence is in the Invercargill-Rakiura Constituency area.

After 3 years of serving and listening to Southlanders I want to continue to be an urban representative who works hard to be actively involved in decision making at Environment Southland. I have completed Resource Management Act training, am a ES representative on several governance groups including Welcoming Communities, Ride Southland and an urban air quality working group. I value our open relationship with iwi partners. We have big issues approaching from central government and our community: water quality and quantity, biodiversity, biosecurity, coastal management and climate change. Good decisions need good science, local knowledge, an understanding of the framework and an open mind. Working with all parties to clarify outcomes, and finding ways to achieve these, will be essential. As a mother of two teenage boys, a teacher, an arts advocate, and volunteer, I would value your vote to bring my perspective and skills to Environment Southland.
