

Southland Regional Council  
(known as Environment Southland)  
Hokonui Constituency  
Electing 1 Regional Councillor

---

**Peter MCDONALD**

My principal place of residence is in the Hokonui Constituency area.

Southland has some far-reaching decisions to make in regards to water quality. As Bottom lines may be handed down from central government, Southland will have choices on implementation and timeframes of these improvements. I believe some new thinking has to be directed into this area.

Water quality improvements have to be aspirational as well as considerate of community wellbeing.

I believe Southland can manage our way forward with careful accountable decision making.

I've had varied experience across the community including, 23 years as a volunteer firefighter, have chaired a national farming group, involved in ANZAC and fire service peer support for mental wellbeing. Appointed to the Southland conservation board and involved in Catchment and Landcare groups.

If I'm fortunate to gain your support I would advocate for accountability across all areas of council.

Thank you for your consideration.

Please call to discuss. 0274 340 314.
