

Focus Activity Farm Plans

Call our Land Sustainability team now to find out how they can help you.

What is a Focus Activity Farm Plan?

A *Focus Activity Farm Plan* is an environmental plan that provides farm specific good management practice advice and recommendations for your property.

The good management practice recommendations will concentrate on:

- Nutrient management
- Winter grazing
- Riparian management

Other good management practice recommendations may be included if necessary.

A *Focus Activity Farm Plan* contains several colour aerial photo maps detailing soil types, waterway locations and winter grazing paddocks, along with factsheets and recommended actions for your farm.

What are the benefits of a plan?

Some of the benefits of having a *Focus Activity Farm Plan* include:

- Identifying the environmental risks specific to your property
- Managing soil, water and nutrient losses, which cost you money
- Demonstrating that your management practices are having a positive impact on the environment.

Farmers who have had a *Focus Activity Farm Plan* compiled for their property are also able to apply for funding to assist with the implementation of these recommendations.

Contact us now

Contact the Land Sustainability team at Environment Southland if you would like a Focus Activity Farm Plan compiled for your property.

A team member will arrange a time to visit, undertake a survey of your farm and prepare a plan from the information gathered.
