Outcome sought

I wish Environment Southland to make the following decision

Why I wish Environment Southland to make this decision

To oppose the application.

1.The removal of the existing amount of water consent is already lowering the underground level in dry periods -more so this year-without the proposed increase.

2.Consent for 35 years is too long. Existing conditions have occasionally not been met in the past or actioned on when in dispute.

At this stage we do not know the final decision on the Three Waters and further climate change legislation.

3.The weekly feed out of bio -solids to pasture attracts large flocks of sea gulls and other scavenger type birds.

These birds pick up meat items (sheep/goat legs) - get airborne, and frequently drop these on my property.

Plastic items from sheep and wind blown wool from these feed-outs often blow over the boundary fence.

This indicates that current procedures for dealing with rendering is insufficient.
