Outcome sought

I wish Environment Southland to make the following decision

To oppose the application.

Why I wish Environment Southland to make this decision

I feel that at levels applied for in consent there will be increased nutrient loading from water foul due to increased areas of pasture land made into a swampy state that causes geese and swans etc to increase in numbers in these areas , also more previously dry pasture land will likely leach nutrients due to being in a water logged state.

Feel that infrastructure will be effected like bridges and roading that effects other land owners property
