

Outdoor burning

Disposing of hedge trimmings and garden waste by burning it on your property is convenient but it comes with responsibilities. It may also be harmful to your health and the environment.

The Southland Regional Air Plan contains some rules about what you can and can't burn in Southland, and when you can burn it.

▶ Be a considerate neighbour

If your only option is to burn, you are responsible for any smoke nuisance you cause. Consider the following best practice tips:

- **Small piles minimise smoke** – make sure all burning material is dry, well aerated and loosely stacked in small piles so it burns hot and without excessive smoke. Burning green or damp hedge cuttings and vegetation causes excess smoke.

- **Keep your distance** – burn downwind and as far away from property boundaries, other houses, roads, hedges etc as possible.
- **Check weather conditions** – check the direction the smoke will blow. Will it affect neighbours? Burn in a light breeze and avoid burning in an inversion layer.
- **Notify the neighbours** – talk to them about a convenient time to burn. This is a much better option than dealing with an unhappy neighbour.
- **Check for fire bans and restrictions** – to find out what the fire risk is and if you'll need a permit to light your fire, go to www.checkitsalright.nz.

- **Supervise the fire at all times** and be prepared to put it out if it creates a nuisance. Uncontrolled fires must be reported to Fire and Emergency New Zealand – call 111.

Burning restrictions in Invercargill & Gore

If you live within the Invercargill or Gore airsheds, you can only burn outdoors between **1 September and 30 April**.

Leisure activities such as barbecues, braziers, hangi and fireworks are exempt from this rule.

▶ What can I burn?

You can only burn material listed as permitted in the Regional Air Plan:

- Burn dry vegetation – make sure all burning material is dry, well aerated and loosely stacked in small piles so it burns hot and without excessive smoke. Burning green or damp hedge cuttings and vegetation causes excess smoke.

▶ What can't I burn?

You can't burn any of the following:

- synthetics including plastic, rubber, baleage wrap and agrichemical containers.
- tyres, used oil and metal products
- chemically treated timber such as fence posts and some building materials
- painted and varnished timber

Download a full list of prohibited fuels from the Breathe Easy website – www.BreatheEasySouthland.co.nz

▶ Special rules for industrial sites

If your property is an industrial site, any burning is prohibited unless you have a consent. You can apply to Environment Southland for a consent.

▶ Other disposal options

There are alternative options for disposing of household and farm waste materials. These include using a kerbside waste collector, taking waste to local transfer station, hiring a mini skip, using a commercial collection company, recycling, reusing,

composting vegetation and mulching hedge cuttings. Burying waste is not recommended.

For information on rural waste solutions and reducing waste go to www.es.govt.nz/environment/pollution-and-waste/farm-waste

To find out how to dispose of other waste materials visit the Orange Pages recycling directory at: www.wastenet.org.nz

▶ Contact us

If you have any questions about outdoor burning or nuisance from smoke caused through burning, contact Environment Southland on 0800 76 88 45.

Farm plastics recycle schemes

▶ Recycle South

Baleage wrap, agricultural plastic containers and drums

- Drop off - 210 Branxholme Makarewa Road, Invercargill Monday to Friday: 8am - 4pm
- Tel 03 211 0069
- enquiries@recyclesouth.org.nz
- www.recyclesouth.org.nz

▶ Plasback

CMC Contracting – Baleage wrap and plastics collection

- Tel Karina – 027 317 7482
- cmcplasback@xtra.co.nz
- www.cmccontracting.nz

▶ Agrecovery

Plastics and drums collection

- Tel 0800 247 326
- Register free online at www.agrecovery.co.nz

▶ Southland Waste Transfer Stations & Recycling Centres

See Wastenet Southland's website for details of the waste transfer stations and recycling centres in Southland – www.wastenet.org.nz
