**NOTICE OF REQUEST TO BE A PARTY TO PROCEEDINGS UNDER S274 OF THE RESOURCE  
MANAGEMENT ACT BY ROBERT GRANT**

1. Robert Grant wishes to be a party to Notice of Appeal ENV-2018-CHC-000050 dated 22 May 2018 by Royal Forest and Bird Protection Society of New Zealand Incorporated to the Environment Court (“**the Appeal**”) against the Decision of the Southland Regional Council on the Proposed Southland Water and Land Plan (“**the Proposed Plan**”).
2. Robert Grant is entitled to be a party to the Appeal because:-
  - (a) He made a submission on the Proposed Plan and lodged a Notice of Appeal ENV-2018-CHC-000045 dated 17 May 2018 (“**Robert Grant Appeal**”) which seeks relief on matters addressed in the Appeal.
  - (b) He owns and farms land in Otamita, Eastern Southland, the management of which will be directly affected by the relief sought in the Appeal.
3. Robert Grant is not a trade competitor for the purposes of s308C or s308CA of the Resource Management Act 1991.
4. Robert Grant is interested in the parts of the Appeal as set out below.
5. **Rule 20 – Farming: Intensive Winter Grazing**
  - a. The proposal to include ephemeral rivers (by deleting Rule 20(aa) and amending Rule 20).
  - b. The proposal to make farming activities that don’t meet the standards a non-complying activity.
6. **Rule 25 - Cultivation**
  - a. The proposal to include ephemeral rivers.
7. **Rule 70 - Stock access**
  - a. The proposal to include ephemeral rivers and wetlands.
  - b. The proposal to make farming activities that don’t meet the standards a non-complying activity;
  - c. The proposal to add further performance standards.

8. Robert Grant opposes the relief sought for the reasons set out below.

9. **Rule 20 – Farming:**

(i) *The proposal to include ephemeral rivers (by deleting Rule 20(aa) and amending Rule 20)*

9.1 The proposal could mean Robert Grant would need a consent for much of its current normal operations, yet there are unlikely to be important values present or any adverse effects from its activities. A single paddock can contain multiple ephemeral rivers therefore it would be almost impossible to adhere to this rule and would be an inefficient use of resources.

9.2 Where land is to be cultivated or intensively winter grazed, the Farm Environmental Management Plan is required to identify these areas and include good management practices for the reduction of sediment and nutrient losses from these areas (Appendix N3(l)(i) and 5(b)(i).

(ii) *The proposal to make farming activities that don't meet the standards a non-complying activity*

9.3 There is no rationale provided to make farming that doesn't meet standards non-complying, versus the proposed discretionary activity.

9.4 The relief sought would be overly burdensome and costly.

10. **Rule 25 Cultivation**

(i) *The proposal to include ephemeral rivers*

10.1 The proposed inclusion is opposed for reasons set out in paragraphs 9.1-9.2.

11. **Rule 70 Stock access**

(i) *The proposal to include ephemeral rivers and wetlands*

11.1 This is opposed for reasons set out in paragraphs 9.1-9.2.

(ii) *The proposal to make farming activities that don't meet the standards a non-complying activity*

11.2 There is no rationale provided to make stock access that doesn't meet standards non-complying versus the proposed discretionary activity.

(iii) *The proposal to add further performance standards*

11.3 The proposed performance standards are overly burdensome, and it is unclear what, if any, added benefit they will achieve.

12. Robert Grant agrees to participate in mediation or other alternative dispute resolution of the proceedings.

Signed for and on behalf of Robert Grant:-
