

BEFORE THE HEARING PANEL OF SOUTHLAND REGIONAL COUNCIL

In the matter The Resource Management Act (RMA, 1991)

And

In the matter of Resource Consent Application's including land use permits, water permits and discharge permits (APP-20191052)

By Woldwide One Limited and Woldwide Two Limited

**STATEMENT OF EVIDENCE OF
AURORA GRANT AND ALEX ERCEG
REPORTING OFFICERS REGARDING BASELINE ISSUES
30 OCTOBER 2019**

Introduction

1. This statement of evidence is filed in accordance with the directions issued by the Panel dated 7 and 11 October 2019.
2. This statement addresses:
 - 2.1 the matter of whether or not a 2011 set of consents or a 2017 set of consents held by Woldwide Two Limited form the baseline;
 - 2.2 the exclusion of unlawful activities from the baseline; and
 - 2.3 the appropriateness of the current modelling before the Panel.
3. For the reasons outlined in this statement and in the Section 42A Report dated 9 September 2019, we are of the opinion that the 2017 consents are part of the baseline, other activities have been included in the baseline that should be excluded and, as a result, the modelling before the Panel cannot be relied on.
4. However, this is not a simple issue to resolve. If the Commissioners determine that the baseline and existing environment should be based on the 2011 consents, there are still issues with the modelling that means it cannot be relied on. In addition, a question of scope will arise.

Background

5. The application lodged with Council in March 2019 explicitly refers to the 2017 consents as forming part of the existing environment that makes up the baseline for the Overseer modelling and Assessment of Environmental Effects. The application, as lodged, makes no reference to the 2011 consents, nor whether the 2017 consents had been exercised or not.
6. The application was proposed on the basis the 2017 consents were the baseline, and the Section 42A Report was also prepared on that basis (which addressed concerns regarding the modelled baseline in detail). However, in her evidence and at the hearing Ms Legg stated that the reference to the 2017 consents was a mistake and that those consents:
 - 6.1 had not been exercised;
 - 6.2 did not form part of the baseline; and
 - 6.3 Did not make up part of the existing environment.
7. Since identifying this, the applicant has not supplied an updated baseline Overseer modelling or updated Assessment of Environmental effects assessing the effects of the proposed activities against a baseline using the 2011 suite of consents rather than the 2017 suite of consents.
8. In addition to the issues with the 2011 and 2017 consents, the baseline Overseer modelling appears to include activities that are not lawfully authorised. The existing environment cannot include activities that are undertaken unlawfully without authorisation under the RMA, a rule in a plan or by valid resource consents.

9. As the issues were addressed in detail in s42A and at hearing, including comments regarding was witnessed on the ground during site visits, this statement is limited to providing detail on the various consents held by the Applicant and the activities that can occur lawfully under these consents, as well as those activities are unlawful.
10. This statement has been prepared to provide helpful information on order to allow the Panel to consider the information before them and can determine whether the modelled baseline as proposed in the application reflects the lawful and consented baseline which will be different depending on whether the 2011 or 2017 consents form the baseline.
11. Given the applicant's opposition to the s42A officers undertaking further work to obtain further evidence no other investigations have been undertaken. This statement responds only briefly to the processing of the 2017 consents outlined by the applicant in the submissions dated 10 October 2017 as we consider that this is not relevant to the baseline issues or the processing of this application.

Pre Application and Application as Lodged

12. In the form the application was lodged, all overseer modelling and assessment of effects were undertaken based on the fact the 2017 suite of consents were in use and valid.
13. On page 78 of the applicants evidence supplied on 10 October 2019¹, a summary from a pre-application meeting held was provided, which states;

“Nessa explained that all land within the proposed boundary has been used for dairy farming for a long time (pre 3 June 2016) or was used for dairy support and subsequently consented for dairy farming in October 2017. Aurora and Courtney confirmed that the interpretation that the expansion does not include new land/increased land into dairy farming, but is an expansion through an increase in cow numbers is correct”.
14. As a matter of fact, Ms Legg undertook pre-application meetings on the basis the 2017 suite of consents formed the baseline and part of the existing environment.
15. All advice given in this pre-application meeting was based on that information.
16. All draft applications and subsequent comments provided by Council were also based on this.
17. Should the 2017 suite of consents not form part of the baseline, then Ms Legg was incorrect in her statements that the expansion does not include new land/increased land into dairy farming.
18. The s42A report and Council evidence was also based on the information provided by the applicant that the 2017 suite of consents were the baseline as indicated by Ms Legg in pre-application meetings and draft applications and the final lodged application.

¹ Included in an Appendix of the 10 October 2019 submissions by the applicant titled “Summary of Meeting 25/6/18”.

19. The s42A report indicated that the 2011 suite of consents had not been surrendered and as such the applicant was non-compliant with the 2017 suite of consents, however the application was assessed as applied for to ensure the assessment was within the scope of the application.

Consents Held

20. A suite of resource consents are held by Woldwide Two Limited. These have been generally referred to as the 2011 consents and the 2017 consents, but also include a number of changes to conditions under section 127 that have been approved by the Council.

21. The 2011 consents currently include:

Discharge Permit AUTH-300626-V2. The original discharge permit (AUTH-300626) was granted in 2011. In August 2012 the applicant made a joint application relating to several Woldwide farms, which included an application to change the conditions of AUTH-300626. The application for a change was withdrawn, so the change was not granted (though would have been numbered AUTH-300626-V1). On 14 July 2014 a change of conditions was granted, which increased/changed the discharge area, increased the amount of effluent discharged from 660 cows to 800 cows and increased the volume of wintering barn effluent from 500 to 600 cows (AUTH-300626-V2). The grant of the changes to the conditions meant that the original discharge permit has been superseded, with AUTH-300626-V2 being the current version.

Water Permit AUTH-300627-V1. The original water permit (AUTH-300627) was granted in 2011. A change to the conditions was granted on 14 July 2014, which increased the volume of water that could be abstracted (AUTH-300627-V1). The grant of the changes to the conditions meant that the original water permit has been superseded, with AUTH-300627-V1 being the current version.

22. The 2017 consents currently include the following consents, all of which were granted on 18 October 2017:

Discharge Permit AUTH-20171278-01 - The discharge permit includes a condition requiring that it not be exercised until discharge permit AUTH-300626-V2 is surrendered or has expired.²

Water Permit AUTH-20171278-02 - The water permit includes a condition requiring that it not be exercised until AUTH-300627-V1 is surrendered or has expired.³

Land Use Consent AUTH-20171278-03 - The land use consent has no condition restricting when it is exercised, other than it shall be exercised in conjunction with Discharge Permit AUTH-20171278-01 and Water Permit AUTH-20171278-02.⁴

² Condition 1 Discharge Permit AUTH-20171278-01.

³ Condition 2 Discharge Permit AUTH-20171278-02.

⁴ Condition 2 Land Use Consent AUTH-20171278-03.

23. We consider the lack of express requirement that other consents are surrendered before the 2017 land use consent is exercised means that the fact that the applicant has not surrendered AUTH-300626-V2 or AUTH-300627-V1 does not prevent the 2017 land use consent from being exercised.

2011 Consents

24. In summary, the 2011 consents (AUTH-300626-V2 and AUTH-300627-V1) authorise the following activities;
- 24.1 the discharge of dairy shed effluent from up to 800 cows;
 - 24.2 the discharge of winter barn effluent from up to 640 cows; and
 - 24.3 the take and use of up to 80,000 litres per day of groundwater from Bore E45/0083.
25. These consents do not authorise;
- 25.1 the discharge of underpass effluent via the agricultural effluent system;
 - 25.2 the discharge of silage leachate via the agricultural effluent system;
 - 25.3 the discharge of effluent or slurry to any part of the Horner Block;
 - 25.4 the take and use of groundwater in excess of 80,000 litres per day; and
 - 25.5 the abstraction of groundwater from Bore E45/0727.
26. Under the 2011 suite of consents the use of land farming where the landholding includes a dairy platform and/or intensive winter grazing would be a permitted activity provided the following criteria are met;
- 26.1 from January 2010 (under the Operative Regional Water Plan):
 - 26.1.1 grazing or stock access is not within 3 metres horizontally of water in a lake, river, modified water course, when intensive winter grazing has been undertaken; and
 - 26.1.2 there is no establishment of a new dairy farm;
 - 26.2 from 4 April 2018 (under the Decisions Version of the Proposed Southland Water and Land Plan):
 - 26.2.1 the cow numbers have not increased beyond the maximum number specified in the dairy effluent permit that existed on 3 June 2016;
 - 26.2.2 the land area of the dairy platform is no greater than at 3 June 2016;
 - 26.3 from 1 May 2019 (under the Decisions Version of the Proposed Southland Water and Land Plan):
 - 26.3.1 a Farm Environmental Management Plan for the landholding is prepared and implemented in accordance with Appendix N of the proposed Southland Water and Land Plan;
 - 26.3.2 intensive winter grazing does not occur on more than 15% of the area of the landholding or 100 hectares, whichever is lesser;

- 26.3.3 all required good management practices⁵ are implemented; including
 - 26.3.3.1 a vegetated strip is maintained in, and stock excluded from, the area between the outer edge of the bed of any lake, river, artificial watercourse, modified watercourse for a distance of at least 5 metres;
 - 26.3.3.2 critical source areas (including swales) within the area being grazed that accumulate runoff from adjacent flats are grazed last.

27. The 2011 suite of consents does not authorise the use of the blocks of land referred to as “SH96/Marcel” for dairy farming. As the block was not part of the dairy platform prior to 3 June 2016, under the Proposed Southland Water and Land Plan, resource consent is required for dairy farming of those blocks.

2017 Consents

28. The discharge permit (AUTH-201712878-01) and water permit (AUTH-20171278-02) from the 2017 suite of consents authorise the following activities;
- 28.1 the discharge of dairy shed effluent from up to 800⁶ cows;
 - 28.2 the discharge of winter barn effluent from up to 640 cows;
 - 28.3 the discharge of effluent slurry to 42 hectares of the Horner Block;
 - 28.4 the use of the Horner Block for effluent discharge and cut and carry only;
 - 28.5 the discharge of silage leachate;
 - 28.6 the discharge of underpass effluent;
 - 28.7 the discharge of effluent to the Horner Block (42 hectares) where the loading rate of nitrogen from effluent does not exceed 200 kilograms of nitrogen per hectare per year;
 - 29.8 the take and use of 96 cubic metres per day of groundwater; and
 - 29.9 the abstraction of groundwater from Bore E45/0083 and Bore E45/0727,
29. The land use consent for expanded dairy farming (AUTH-20171278-03) authorises the following activities;
- 29.1 the discharge and water abstraction and use activities authorised by AUTH-20171278-01 and AUTH-20171278-02; and
 - 29.2 the incorporation of the “SH96/Marcel” blocks into the dairy platform.
30. Had the 2017 suite of consents not been exercised, then the “SH96/Marcel blocks” should not have been converted into dairy platform nor can they be considered to make up part of the current dairy platform.
31. Upon the granting of the 2017 consents, Council received no objection or request to amend any alleged errors in the consent and the applicant has been invoiced and has paid the annual charges since the grant of the consent (refer Appendix 4 for invoices).
32. Council has not received an application to surrender the 2017 consents to date.

⁵ A full list of these good management practices can be found under Rule 20 of the proposed Southland Water and Land Plan.

⁶ This is a maximum number of cows authorised to be milked, not the number of cows at peak milk.

Discharge to Horner Block

33. The discharge of effluent slurry to the Horner Block is an important consideration when determining either what consents are being relied upon and/or being exercised and also what forms part of the lawful existing environment for which subsequent baseline modelling can be undertaken and relied upon.
34. Various Woldwide Companies hold consents that authorise the discharge of effluent “slurry” to the Horner Block. These companies are;
 - Woldwide One Limited;
 - Woldwide Two Limited; and
 - Woldwide Three Limited.
35. Woldwide One Limited holds discharge permit AUTH-301663 which authorises the discharge of effluent slurry to a portion of the Horner Block where as a result of the slurry discharge the nitrogen loading does not exceed 150 kilograms of nitrogen per hectare per year⁷.
36. Woldwide Two Limited holds discharge permit AUTH-20171278-01 which authorises the discharge of slurry effluent to 42 hectares of the Horner Block where as a result of the slurry discharge the nitrogen loading does not exceed 200 kilograms of nitrogen per hectare per year.⁸ As noted above, no discharge is authorised from Woldwide Two to the Horner Block under the 2011 consents.
37. Woldwide Three Limited holds discharge permit AUTH-301665-V2 which authorises the discharge of slurry effluent to a portion of Horner Block where as a result of the slurry discharge the nitrogen loading does not exceed 150 kilograms of nitrogen per hectare per year.⁹
38. All three discharge areas are independent of each other and do not overlap.

⁷ Condition 4(a)(ii) of Discharge Permit AUTH-301663

⁸ Condition 4(c)(ii) of Discharge Permit AUTH-20171278-01

⁹ Condition 4(a)(ii) of Discharge Permit AUTH-301665-V2

39. The original Woldwide Three Limited Discharge Permit, AUTH-301665 has been changed twice. The original discharge permit and the first change (AUTH-301665-V1), have both been superseded by the current permit (AUTH-301665-V2).
40. On 4 August 2017 Woldwide Three Limited lodged an application to vary Discharge Permit AUTH-301665-V1 to;

“... change conditions of resource consent 301665-V1 to ensure effluent cannot be discharged on the same area as Woldwide Two (consent application 20171278).¹⁰
41. Discharge Permit AUTH-301665-V2 was granted on 31 August 2017¹¹ and automatically superseded Discharge Permit AUTH-301665-V1.
42. As a matter of fact, as Discharge Permit AUTH-301665-V1 had been superseded and no annual charges or monitoring charges for AUTH-301665-V1 have been invoiced by Council, nor have any been paid by Woldwide Three Limited subsequent to AUTH-301665-V1 being superseded. In the Council’s system AUTH-301665-V1 is treated as no longer existing.
43. It is acknowledged that Discharge Permit AUTH-301665 and AUTH-301665-V1 included a discharge area that included what was to become the discharge area for Discharge Permit AUTH-20171278-01 held by Woldwide Two Limited, however, as requested by Woldwide Three Limited, this area was removed and could no longer be utilised by Woldwide Three Limited upon the granting of Discharge Permit AUTH-301665-V2.

¹⁰ Application to Change Conditions of Resource Consent 301665-V1 – Assessment of Environmental Effects; Prepared for Woldwide Three Limited – 4/8/2017 by Nicole Matheson (Aqualinc).

¹¹ This was prior to AUTH-20171278-01 (which authorises the discharge of effluent from Woldwide Two Limited to the area this variation sought to remove to accommodate the Woldwide Two discharge) being granted.

44. Appendix 1 summarises the dates associated with the granting and superseding of the consents mentioned in this section.

Summary of Activities Authorised by Consents¹²

Consent Number	AUTH-300626	AUTH-300626-V2	AUTH-20171278-01
Granted Date	2-Dec-11	14-Jul-14	18-Oct-17
Expired/Superseded Date	14-Jul-14	2-Dec-21	18-Oct-27
Cow Numbers (Milking)	660	800	800
Cow Numbers (Barn)	500	600	640
Underpass Effluent	N	N	Y =200m ²
Silage Leachate	N	N	Y =1,200m ² pad
Winter Barn Effluent	Y	Y	Y
Feed Pad Effluent	N	N	N
Winter Milking	N	N =not changed under the variation	N
Water Abstraction	Y AUTH-300627 =66,000l/day	Y AUTH-300627-V1 4-Aug-14 =80,000l/day	Y =2l/sec. 96 m ³ /day. 30,672m ³ /year
Discharge to Horner	N	N	Y =42ha
N loading (Platform)	150kg/N/ha/yr	150kg/N/ha/yr	150kg/N/ha/year
N loading (Horner)	N/A	N/A	200kg/N/ha/year

Variations

45. A question has arisen during the hearing relating to previous versions of consents being relied upon.
46. An application made under s127 of the RMA is not an application for a new consent but rather an application for a *“change or cancellation of consent condition”*¹³.
47. The applicant can no longer rely on previous versions of consents as they no longer exist and this is evident by the invoices attached as Appendix 2 which show that subsequent to variations being granted, the applicant (or any of their associated companies) has not been charged annual charges on superseded versions of Resource Consents, nor have they paid any annual charges on the respective superseded versions of those Consents.
48. As the original version (for example AUTH-301665) has been exercised, upon granting a variation, change or amendment (as applied for under s127 of the Act), the new version, by virtue, is automatically exercised and as such automatically supersedes the previous version of that consent.

¹² Land Use Consent AUTH-20171278-03 is not included in this table because the applicant did not hold a previous land use consent for dairy farming to authorise the use of SH96/Marcel as part of the dairy platform.

¹³ s127 of the Resource Management Act 1991

Overseer Modelling in Application

49. As discussed, the application, as lodged, and consequently the baseline overseer modelling and assessment of effects has been based on the 2017 suite of consents forming the existing environment.
50. This includes the modelling of “SH96/Marcel” as being part of the dairy platform and the discharge of slurry effluent from Woldwide One Limited and Woldwide Two Limited to the entire Horner Block.
51. The way modelling has been undertaken in itself creates difficulty in determining what consents are authorising the activities that are being modelled. This includes;
 - 51.1 the Woldwide One Limited and Woldwide Two Limited (including SH/96 and Marcel) Dairy Platforms have been modelled as a combined platform rather than as separate platforms as they exist in the environment;
 - 51.2 the effluent slurry discharge to the Horner Block has been modelled as coming from Woldwide One and Woldwide Two and being discharged to the entirety of the Horner Block rather than being modelled separately from each platform and discharged to the respective discharge areas; and
 - 51.3 the discharge of effluent to the Horner Block with a nitrogen loading rate of 166 kilograms per hectare per year, which can only be assumed to be an average over the entire block, and also exceeds the limit imposed by AUTH-301663 and all three variations of the AUTH-301665 permits.
52. Should the 2017 suite of consents not form part of the existing environment, then by virtue they should not form part of the baseline overseer monitoring as such a scenario would not represent the actual lawful use of the land.
53. If this is the case, and the 2011 suite of consents are determined to be the suite of consents relied upon then the applicant must remove the following from the baseline overseer modelling;
 - 53.1 SH96/Marcel from the dairy platform;
 - 53.2 all slurry discharge to the Horner Block from Woldwide Two Limited;
 - 53.3 any slurry discharge to the Woldwide Two Discharge Area to the Horner Block from 31 August 2017;
 - 53.4 any slurry discharge that exceeds a nitrogen loading of 150 kilograms of nitrogen per hectare per year to each individual discharge area; and
 - 53.5 cow numbers in excess of 800 milking cows as a maximum (or 1340 milking cows as a maximum under the current combined modelling).
54. All activities listed in para 53 are not authorised under the 2011 suite of consents and as such cannot lawfully occur.
55. The discharge of slurry from Woldwide Three Limited to the Horner Block must also be removed from the model if Woldwide Three Limited is not considered to form part of the

applicant's landholding. Nevertheless, the discharge of slurry to Horner Block should be modelled separately from each other to the areas defined by the relevant permits, not as a combined discharge over the entire block.

Scope

56. Should the applicants continue to rely on the 2011 suite of consents, and the Commissioners decide that the 2011 suite of consents do form the baseline, then this becomes a matter of scope and three key issues arise from this;

- the overall effects of the proposal and the baseline will be different, particularly in relation to the additional land that is to be incorporated into the platform;
- the public notification will be based on a different activity that was not applied for as per the application; and
- the application and s42A hearing report and associated reports, especially in regards to conclusions made, may no longer be relevant.

57. As discussed, the application was lodged with the 2017 suite of consents being the consents that the applicant was operating under and formed the baseline environment and consequently this baseline was used to inform the baseline overseer modelling.

58. The application states;

“WW2 currently operates under a land use consent for expanded dairy farming (AUTH-20171278-03), effluent discharge permit (AUTH-20171278-01) and water permit (AUTH-20171278-02), and then goes on to say, “the SH95/Marcel support block, which came into WW2's milking platform”.

59. When considering any scope issues the below comment made in the application is integral. The application stated (my emphasis underlined);

“The land area of the dairy platform is not increasing.”

60. Had the applicant not relied on the 2017 suite of consents, then the above comment is incorrect and not a factual or accurate representation of the activity that is being applied for.

61. As the application was lodged relying on the 2017 suite of consents and then explicitly stating there would be no increase in the area of the dairy platform, the application was assessed this way as this was what was applied for and was the scope of the application.

62. On 5 April 2019 the application was publicly notified for a suite of proposed activities including;

“Land Use Consent to use land for farming including an increase in cow numbers by 160”.

63. The public notice (see Appendix 3) made no reference to an increase in the size of the dairy platform, nor did any of the associated documents uploaded as part of the public notification, as this was not what had been applied for.

64. Should the 2011 suite of consents now be considered to be the baseline then the application as lodged was incorrect and consequently activities as notified and assessed (including the s42A hearing report and technical evidence) is based on application that is incorrect.
65. As such, it is considered, that should the 2011 suite of consents be accepted as the baseline, then the application is no longer within scope of the original activities as applied for, nor is it within scope of the proposed activities as publically notified.
66. It will also place significant risk on the reliance on any assessments of the proposed activities and any conclusions made based on the application and as put forward to the Panel.
67. Furthermore, the application, assessment of environmental effects, supporting reports and s42A report are based on the 2017 consents forming the baseline, as was applied for by the applicant. As no new information has been provided nor has any of the information and modelling provided in the application been updated, the information and the application is deficient and puts the Panel in a difficult position.

Response to Applicant Evidence

68. In para 27 of the Legal Submissions dated 10 October 2019, from the Counsel for the applicant the following statement is made;

“They [the s42A reporting officers] are adamant that WW1 and WW2 form part of a single “landholding”, but then argue that the land use consent for WW2 only has taken effect”.

69. As discussed, the inclusion of Woldwide One and Woldwide Two as a single landholding was the approach taken and put forward by the applicant when the applications were lodged. Irrespective of this, the definition of “landholding” is superfluous to determining whether or not the 2017 suite of consents have been exercised because;
 - 69.1 the rule the Land Use consent was applied for, and granted under was not subject to the definition of the landholding;
 - 69.2 the proposed Southland Water and Land Plan was under the notified version and not the decision version, as such the rule framework was different as was the definition of landholding; and
 - 69.3 the 2017 suite of consents were sought for Woldwide Two only and had no relevance to Woldwide One Limited or the dairy platform for Woldwide One.

Conclusion

70. The unlawful activities and the issues with the surrender of the 2017 suite of consents were highlighted in the s42A Hearing Report as circulated.

71. The application was lodged based on the 2017 suite of consents forming the existing environment and informing the baseline overseer model, without any mention of the 2011 suite of consents.
72. The application has been assessed as was applied for by the applicant and within the scope of that application.
73. Ms Legg has stated that she was incorrect in that the applicant was reliant on the 2011 suite of consents rather than the 2017 suite of consents.
74. As such, the application as lodged is incorrect and is not representative or factual in relation to the actual activities that the applicant had intended as implied by the removal of the 2017 consents from the baseline, in particular, with regards to the statements made in the application that the proposal included no expansion in the size of the dairy platform.
75. The applicant has not provided, should the 2011 suite of consents be relied upon, an updated or correct baseline and associated overseer modelling and assessment of effects.
76. Should the 2011 suite of consents be determined to be the consents that the applicant is to rely on, then;
- the baseline overseer modelling will no longer be representative and will be invalid;
 - the assessment of environmental effects will be based on an incorrect existing environment and incorrect overseer modelling;
 - the conclusions made in the s42A report and associated expert evidence may no longer be relied upon as they are based on incorrect information; and
 - the application will no longer be within the scope of the application as lodged and as publicly notified.
77. Taking into account all information put forward in this statement, there are a number of issues with the modelled baseline regardless of whether the 2011 or 2017 consents are relied on. In addition to that, there are further issues if the 2011 are the baseline, there are other issues, including the sufficiency and adequacy of the information and modelling provided with the application and the assessment of environmental effects. This is a matter the Panel should have regard to in respect of s104(6) of the Act.

Appendix 3 – Public Notice

Woldwide One Limited and Woldwide Two Limited

Public notice is hereby given pursuant to S.95A Resource Management Act 1991 that the following application for resource consent has been received by Environment Southland.

The application [**reference APP-20191052**] is for the following resource consents to authorise proposed activities at:

Woldwide One Limited and Woldwide Two Limited

- **Discharge Permit** to discharge dairy shed effluent from up to 1500 cows and winter barn effluent from up to 1250 cows, underpass effluent and silage leachate to land via travelling irrigator at 10mm depth, slurry tanker with a trailing shoe at 2.5mm depth, umbilical system at 3mm depth, low rate pods with an instantaneous rate of 10mm/hr at 10mm depth and a low rate cannon/rain gun with an instantaneous rate of 10mm/hr at 10mm depth.
- **Land Use Consent** to use land for farming including an increase in cow numbers by 160.
- **Water Permit** to take up to 180,000 litres per day of groundwater from three bores in the Waimatuku Groundwater Zone.
- **Land Use Consent** to use land to use a winter barn for up to 625 cows at Woldwide One Limited, 1200 Hundred Line Road East, Otautau
- **Land Use Consent** to use land to use a winter barn for up to 625 cows at Woldwide Two Limited, 1200 Hundred Line Road East, Otautau

Woldwide Farm Limited (known as the Horner Block)

- **Discharge Permit** to discharge winter barn slurry effluent from up to 1,250 cows to land via a slurry tanker at 2.5mm depth and a nitrogen loading that shall not exceed 250 kilograms per hectare per year at Bayswater Road, Otautau.

Woldwide Runoff Limited

- **Land Use Consent** to use land for a farming activity

Purpose: Dairy Farming Operation

Location: Woldwide One Limited and Woldwide Two Limited: 1200 Hundred Line Road East, Otautau, at about NZTM2000 1225129E 4889724N

Woldwide Farm Limited (known as the Horner Block): Bayswater Road, Otautau, at about NZTM2000 1223115E 4887592N

Woldwide Runoff Limited: Block known as Merrivale Block – 20 Gill Road, Otautau, at about NZTM2000 1202164E, 4885024N

Block known as Merriburn Block – 1711 Otautau Tuatapere Road, Otautau at about NZTM2000 Merriburn – 1199656E, 4885435N

Legal Description of Properties:

Woldwide One Limited and Woldwide Two Limited:

Part Lot 18 DP 942, Section 420 Taringatura SD, Part Lot 1 DP 4092, Part Lot 18 DP 942, Part Lot 2 DP 4092, Part Lot 1 DP 4092, Part Section 417 Taringatura SD, Section 418 Taringatura SD, Section 419 Taringatura SD, Lot 1 DP 9925, Lot 1 DP 14660, Lot 1 DP 14661, Lot 1 DP 451158, Lot 1 DP 13077, Lot 1 DP 5610 and Lot 1 DP 10885.

Woldwide Farm Limited (known as Horner Block) Effluent Discharge Area Only: Lot 4 DP 399915

Woldwide Runoff Limited: Merrivale Block: Part Section 7 Block XII Waiau SD, Part Section 7 Block XII Waiau SD, Part Section 7 Block XII Waiau SD and Lot 1 DP 3537

Merriburn Block: Lot 1 DP 302409, Sec 26 Merrivale Settlement No. 1 and Sec 27 Merrivale Settlement No. 1.

Address for Service: Nessa Legg, Dairy Green Limited, PO Box 5003, Waikiwi, Invercargill 9843

Full details of this application are also available for inspection at Environment Southland, corner of Price Street and North Road, Waikiwi, Invercargill during working hours (8.00 am to 5.00 pm). Enquiries may be directed to Aurora Grant by phone to (03) 211 5115 or by email to aurora.grant@es.govt.nz.

Submissions on the above application must be received by Environment Southland **no later than 5 pm 8 May 2019**. A submission form is available for download below. Submissions may also be forwarded by email to service@es.govt.nz or esconsents@es.govt.nz

 [Submission form](#)

Any person may make a submission on the application, but a person who is a trade competitor of the applicant may do so only if that person is directly affected by an effect of the activity to which the application relates that:

- (a) adversely affects the environment; and
- (b) does not relate to trade competition or the effects of trade competition.

Submissions must be dated and signed (unless submitted electronically) and must include the following information:

1. your name, postal address and telephone number (and fax number if applicable);
2. details of the application in respect of which you are making the submission;
3. whether it is in support of, or in opposition to the application, or is neutral;
4. your submissions, with reasons;
5. the decision that you wish Council to make; and
6. whether you wish to be heard in support of your submission

and you must also serve a copy of your submission on the applicant as soon as reasonably practicable.
